

Better projects. Better contracts. Brighter future.

View[®] is a cloud-based marketplace platform for clean energy developers and power producers.

Join View[®] to connect your solar and storage projects to a larger universe of energy off-takers, landowners, and other key partners.

Marketplace

Support your growth targets by acquiring high-quality sites

Develop Marketplace supports your land acquisition and development teams. It is *free to sign up*, with a success fee at milestones (i.e., Site Control, NTP).

- Use the Develop Marketplace to acquire high-quality sites to feed the top of your early-stage development pipeline.
- If you have a subscription you can further analyze sites as deal conditions change.
- Save time reaching site control with landowners who are educated on the land transaction process.

Mockup for demonstration only. Subject to change.

Sites are pre-qualified in terms of

- solar resource
- topography
- grid interconnection
- wetlands
- flood zones
- commercial feasibility
- *and more!*

Analyze

Make better development & origination decisions to increase the quality & volume of your early-stage development pipeline

- Model different landowner lease or purchase prices, new site boundaries and more to reduce commercial feasibility time.
- Analyze's artificial intelligence and patented algorithms to search through >180 billion project permutations to show you the commercial results of development and origination decisions - and ultimately guide you toward better value PPAs.
- Improve estimation accuracy and establish better contract terms with P90 modeling and best available site-specific data from DNV.
- Rapidly assess your project's commercial feasibility in terms of LCOE, NPV, Off-taker's Settlement, DSCR, and Cash Flow.

Up to
60
basis points gained
on return per project

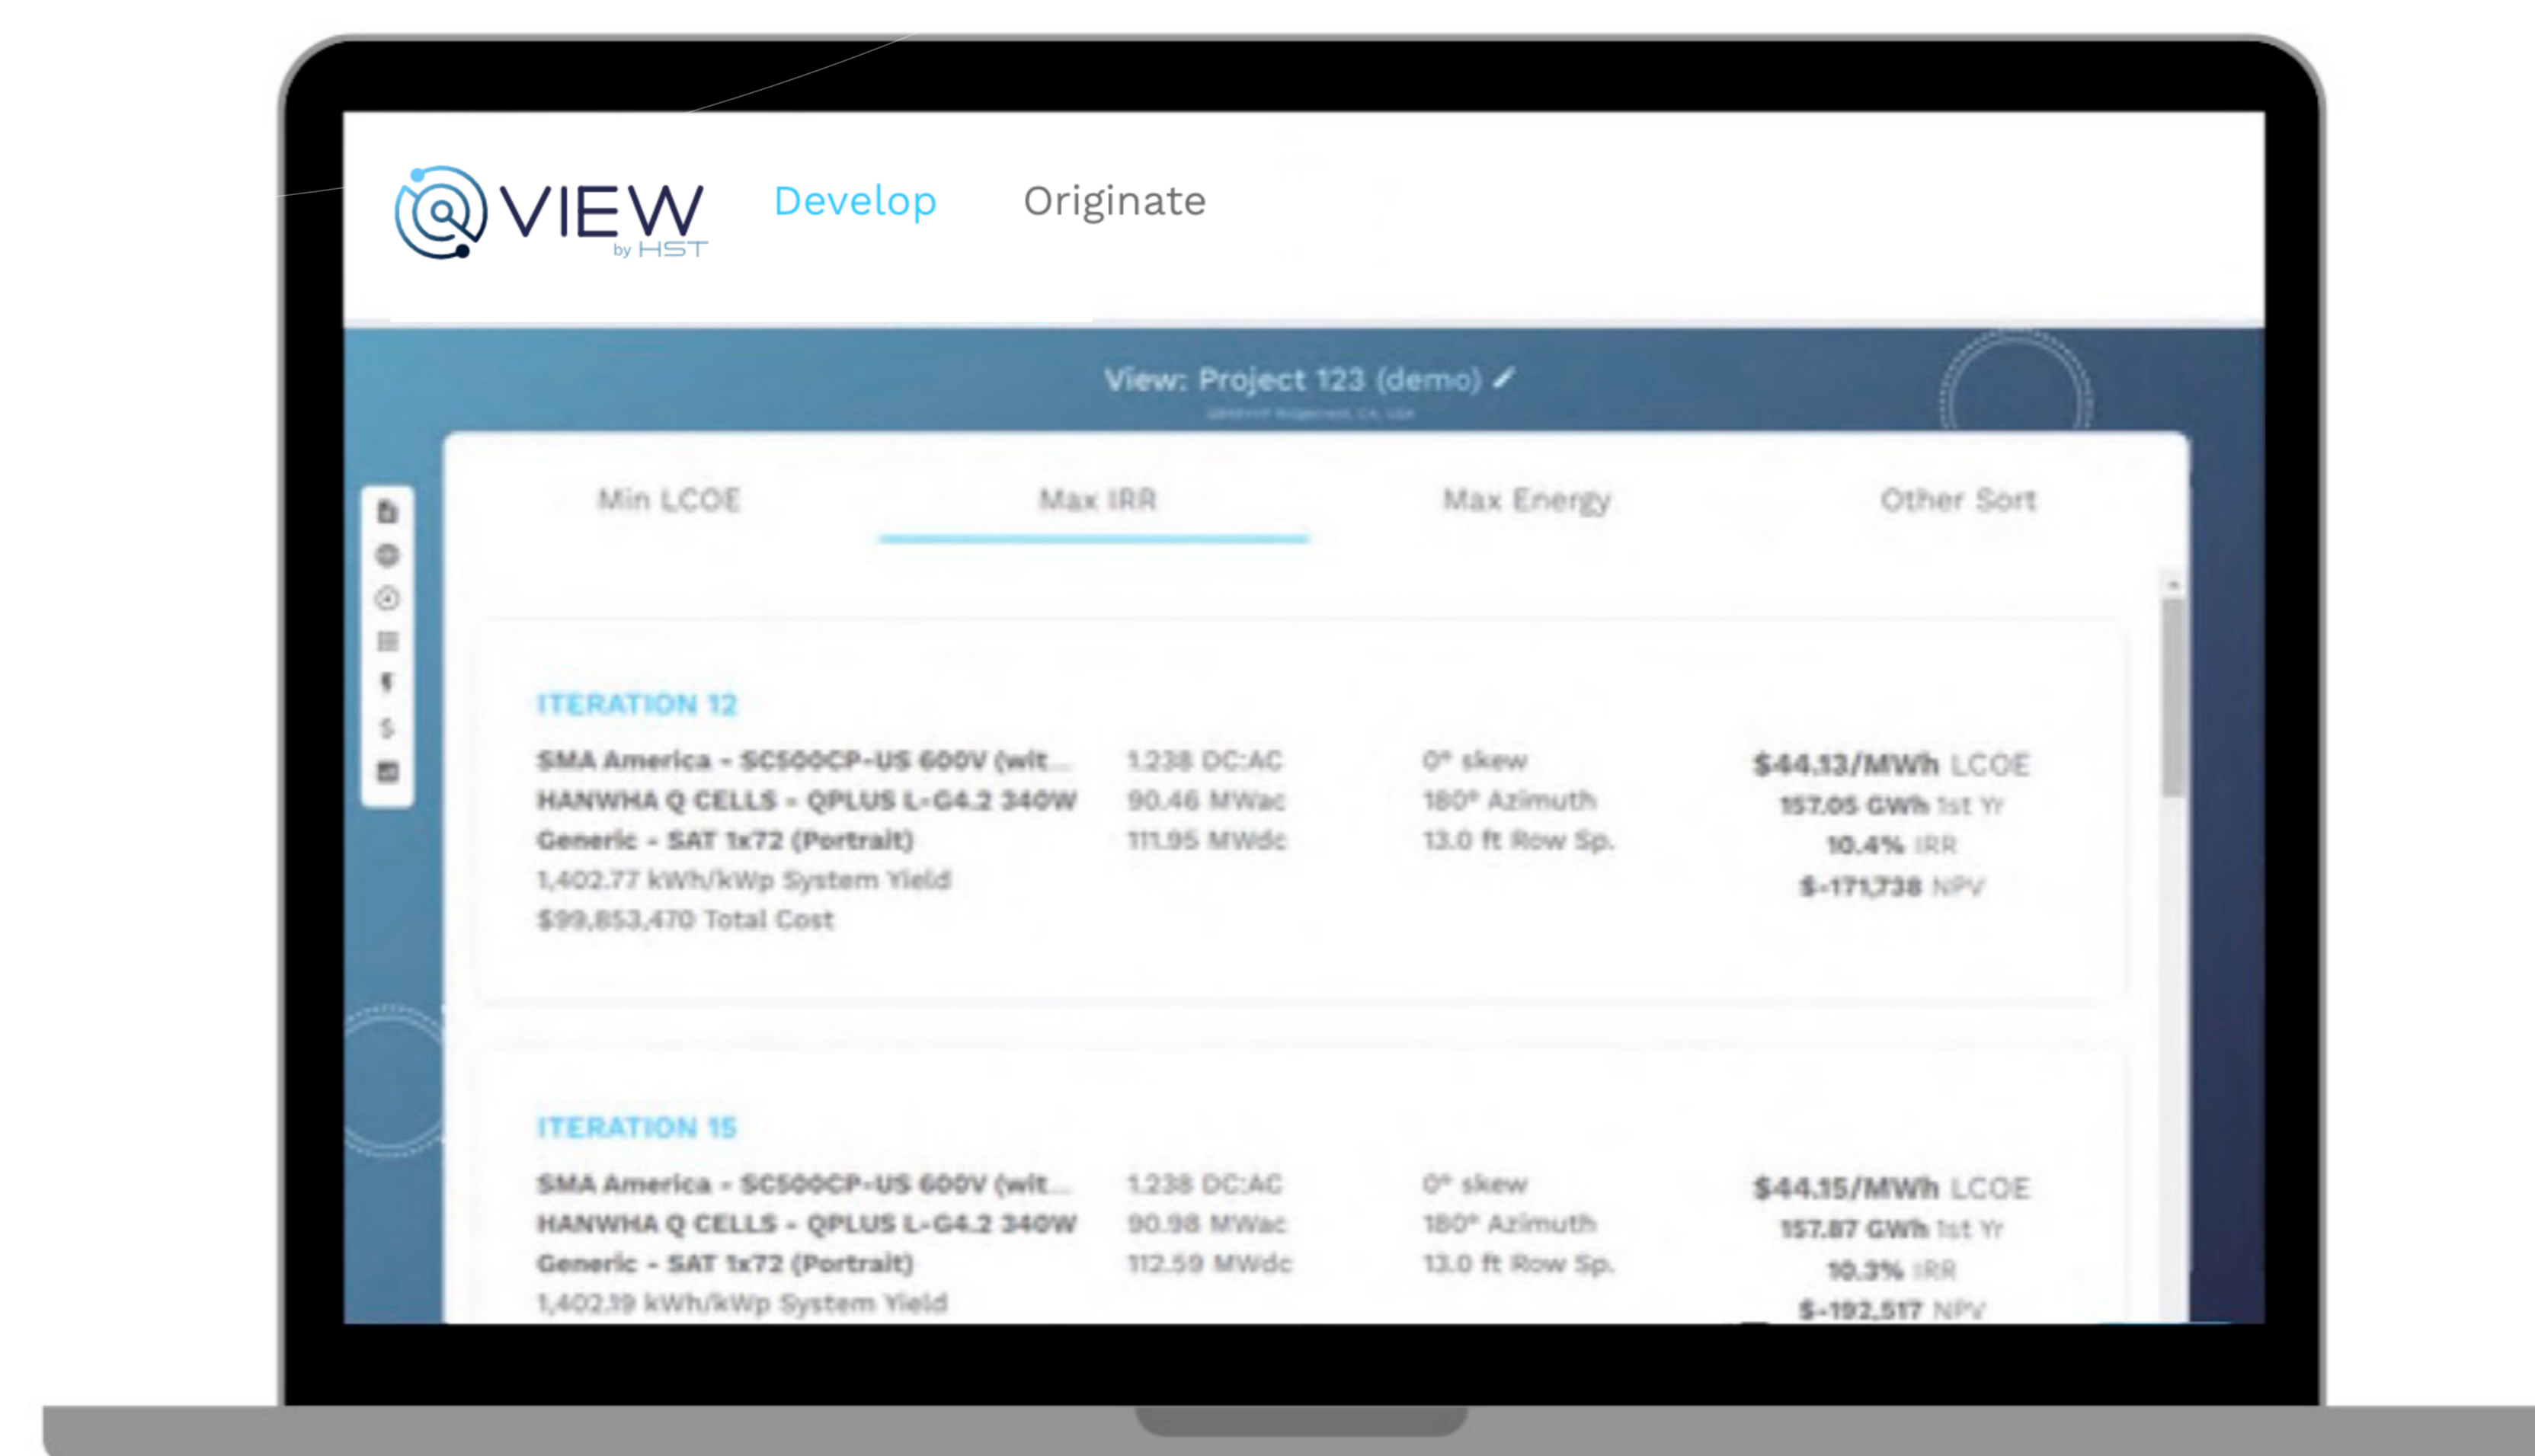

According to an independent evaluation by Itai Suez, former Sr. Solar Engineering Manager at EDP Renewables North America

Up to
70%
increase in
project volume

According to Marynes Cabrera, Senior Development Engineer at Avangrid Renewables

Originate

Accelerate deals by listing projects to the Cue Marketplace for PPAs.

Originate works in tandem with your origination team, supplying additional off-takers beyond your current book of business. It is free to sign up for Originate, with a success fee at milestones (i.e., LOI, PPA, NTP).

- Use Analyze to determine the best configuration of your project to publish to the marketplace.
- Understand the financial outcomes for you and the off-taker's settlement from the beginning to ensure a more balanced contract.
- Find off-takers that match well to your project based on location, PPA price, target and guaranteed COD, and more.

A sample of off-takers ready for projects from Originate

Off-taker Category	Total Load (MWh/year)	Off-taker Category	Total Load (MWh/year)
PJM		ERCOT	
• Defense	1,000,000	• Chemical manufacturer	400,000
• Internet services	53,000	• EPC	36,364
NYISO		ISO-NE	
• Major bank	600,000	• Large retailer	500,000
• Major supermarket	500,000	• Manufacturing	200,000
MISO		Southeast (non-ISO)	
• Major manufacturer	240,000	• Transportation	105,000
• Bioscience	180,000	• Manufacturing	80,000
CAISO		West (non-ISO)	
• Food production	106,000	• Hospitality	500,000
• Manufacturing	95,000	• Plywood supplier	85,000
